

Sore Throat scheme

The Community Pharmacy Sore Throat Test and Treat Service (STTT) is a service building on the existing Sore Throat service available within the NHS Wales Common Ailments Service. The service will enable eligible patients (registered to an NHS Wales GP practice or living within Wales, including temporary residents) to access clinical assessment and the provision of advice and appropriate medication.

The service will be provided through some Community Pharmacies

The service will enable patients requiring assessment of sore throat symptoms via the Common Ailments Service (CAS) to access appropriate clinical screening and assessment and receive appropriate treatment.

The service will be available to children and adults over the age of 6, subject to exclusion criteria as specified in the Common Ailments Formulary for Sore Throat.
